A Quality School with Happy and Responsible Learners
School Guiding Principles
the Four Cornerstones

- Integration of Passion and Professionalism
- Integration of Eastern and Western Cultures
- Integration of the School and the Family
- Integration of the School and the Community
Team of Loving and Professional Teachers

Our teachers are visionary, innovative and caring with different cultural backgrounds and experiences. We love our work and care for children's development.

Our teaching team is composed of over 50 professional educators. 23 of them possess Masters Degrees. The class/teacher ratio is 1:2.4 (most primary schools are around 1:1.4). Teachers are more effective to cater for students' individual needs.

Learning and Teaching

We provide a broad and balanced curriculum. Key Learning Areas, Modules and Extended Learning Activities are closely linked, thus enabling students to have a holistic growth and all-round development. A bicultural and bilingual environment is emphasized. By cultivating a good reading habit and having happy learning experiences, our students are confident and active in their studies.
General Studies

An inquiry approach is adopted in the teaching of General Studies. In the process of inquiry, students are encouraged to ask questions and interact with various learning resources as well as their peers. This allows them to consider different points of view, examine values and attitudes, develop generic skills, gain knowledge and conceptual understanding, and acquire the ability to make decisions about possible action.

Key Learning Areas

Our English curriculum has adopted an interactive approach. It offers enjoyable activities which encourage acquisition of the language. The interactive and relaxing atmosphere both in and out of the classroom builds confidence as students learn. Reading is emphasized which leads to a love of reading. There is also an emphasis on proficiency, creativity and cultural learning. Even among students, cultural differences are appreciated and understood. Among teachers, there are a variety of backgrounds which enables an integration of Eastern and Western teaching methods. Our program is truly integrated and interactive.

數學
數學與我們生活息息相關，是照顧個別差異數學科按能力分組教學；為了鼓勵及激發學生主動學習，老師會提供不同層次的課業及網上練習，讓學生因應自己的需要進行自學。
Integrated Arts

Integrated Arts programmes, includes drama, dance, music and visual art, aim at providing students with a broad and balanced arts curriculum with comprehensive assessment so that students’ multiple intelligences are nurtured.
單元課程

Modules

我們注重學生的多元發展
學生除學習主要學科外，
每學年還會學習十二至十五個單元課程，
透過豐富的學習經歷，
發展多元智能，達至全人教育。

Apart from the Key Learning Areas, all students take 12-15 modules per year, so that the development of their multiple intelligences can be facilitated.
Our students enjoy a wide range of extended learning activities. We offer more than 50 choices which cover social services, sports, cultural and other aspects. Through active participation in their chosen activities, students are able to have a more focused learning.
