# How to Make
Alien UFO

By: Josie

Materials

2 paper plates
colour markers
1 plastic cup (clear)
1 Glue
1 popsicle stick

First, trace out the UFO design on the bottom of both plates.
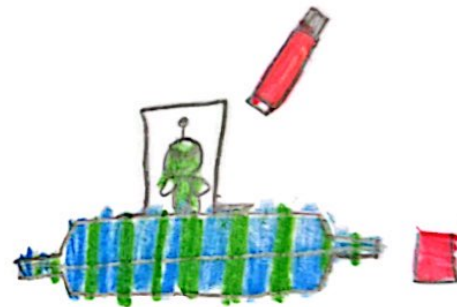

Then, colour both plates with the markers.

Next, glue both plates together, but the outsides need to be showing

Once you are done colouring and cutting out the alien, stick a popsicle stick to the back so it can stand up. Cut the popsicle in half so it would't be too long.

After that, glue the clear plastic cup over the alien.

Finally, you can play with it or hang it with a string.
