.....★ Appearance ★.....

Snake are reptiles. They have long and round bodies and also dry, scaly and orange skin. They can be fat or thin. They have a tongue that flicks. Their eyes can't blink. They slide on the ground.

Diet

They catch small animals such as mice, frogs, fishes and birds. Sometimes they eat pythons, boas and rat snakes.

Habitat

They live in fields and forest. They also live in deserts, oceans and city parks. They live almost anywhere.

fields

Life Cycle

baby

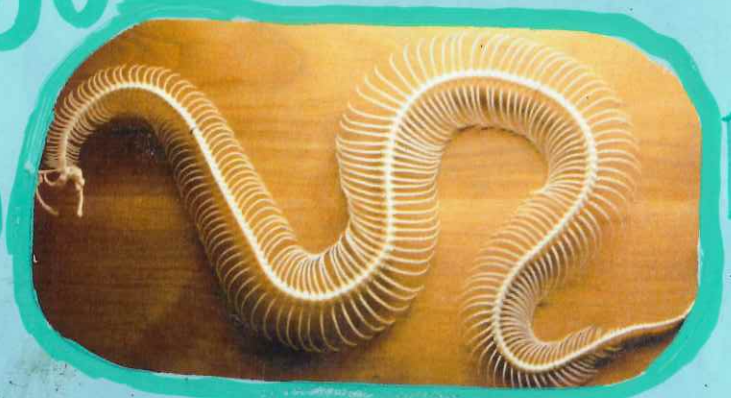

baby snake

They lay 20 or 30 eggs at a time. They give birth to between 5-20 babies. Large pythons can lay up to 100 eggs.

Wow

bones

They are amazing because they slide very fast. They have more than 1000 bones and their bones never stop growing. Every place have 2700 different kinds of snakes. They catch prey with their sharp long teeth.
