and jungles

Life Cycle

Bats give birth to babies.

They also feed babies and take care of them.

Bat's babies

Fun Facts

They fly at night, feed on blood of other animals, and hanging upside down. Some of them also fall into flight!

bats hanging upside down

bat

eyesight — the ability to see or the faculty of vision

blood — the vital liquid circulating through the bodies

jungles — a dense, tangle forest with thick vegetation

habitat — the natural environment where a particular species of plant

flight — the act of traveling through the air, commonly via aircraft or by birds
